

Dura-Tech Vertical Holding Tanks

Water and Chemical storage solutions

Experience

Dura-Tech has been building industrial storage tanks for over 25 years. We build to CAN/CGSB 41.22-93 standards for Glass Fiber Reinforced Plastic Corrosion Resistant Equipment. And ASTM 4097 for Contact - molded glass fiber reinforced thermo set resin corrosion resistant tanks.

Why a Fiberglass Tank?

Fiberglass is inherently non-corrosive and can provide many years of maintenance free service. Fiberglass components service a wide variety of industries but is an especially effective material of choice for corrosive environments. The light-weight strength of fiberglass allows for easy handling and installation.

When choosing the right storage tank, decisions must be made on Capacity, Size constraints, Corrosion resistance and temperature of the product just to name a few. That is where Dura-Tech experience and can offer the best solution for your liquid storage needs. The flexible design options make a fiberglass tank very adaptable and often the most popular choice for chemical and water storage applications.

What Dura-Tech offers

We work closely with our customers to assess their needs and the performance requirements for the tanks. We then prepare a virtual 3D model from which we produce our detailed shop drawings. Matching the fabrication materials to the design and layup schedules, we provide the highest standard of quality for each tank we build. With the latest equipment and workmanship of our fully trained production staff we build our tanks to meet or exceeded our customers expectations.

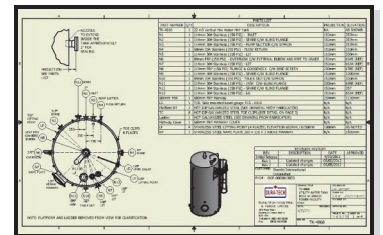

Standard Vertical tanks waiting for fittings to be installed

Insulated tank with Heat trace controller option

Oversize load going to the port of Halifax for overseas destination

In-house 3D design software allows us to build a complete virtual tank for customer approval prior to fabrication

FEATURES

- CORROSION RESISTANCE
- EASE OF INSTALLATION
- LIGHT WEIGHT
- QUALITY CONSTRUCTION
- VERSATILITY
- EASY TO SHIP
- INSULATION OPTION

BENEFITS

- COST EFFECTIVE
- GUARANTEED FIT
- LONG LASTING
- PROVEN QUALITY
- MAINTENANCE FREE
- LONG LIFE
- HIGH STRENGTH
